Summary

Passionate Software Engineer and Full Stack MERN Developer with hands-on experience building scalable web applications using React.js, Next.js, Node.js, Express.js, MongoDB, JavaScript, TypeScript and Tailwind CSS. Experienced in developing REST APIs, authentication systems and AI-powered applications using LangChain, Google Gemini API, Pinecone and Retrieval-Augmented Generation (RAG). Strong understanding of software engineering fundamentals, responsive UI development, Docker, Kubernetes, Git and GitHub.

Skills

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend	React.js, Next.js, Redux Toolkit, Tailwind CSS, GSAP
Backend	Node.js, Express.js, REST APIs, JWT Authentication, Microservices
Database	MongoDB, Mongoose, Pinecone, Redis
AI / LLM	LangChain, Google Gemini API, Mistral AI, RAG, Vector Embeddings
Cloud & DevOps	Docker, Kubernetes, AWS, CI/CD, Git, GitHub Actions
Practices	Agile/Scrum, Unit Testing, API Documentation (Postman)
Developer Tools	Git, GitHub, VS Code, Postman

Projects (Practical Experience)

Perplexity AI Clone (*MERN, LangChain, Gemini API — 2026*) [GitHub](#)

- Built a full-stack AI search engine that generates conversational answers to user queries using LangChain and the Google Gemini API, combined with live internet search.
- Designed and implemented JWT-based authentication and persistent chat history, allowing users to revisit and continue past conversations.
- Architected REST APIs with Express.js and MongoDB, and built a responsive React.js frontend that streams AI responses in real time.

AI Arena — Multi-LLM Comparison Platform (*MERN Stack — 2026*) [GitHub](#) — [Live Demo](#)

- Built a full-stack platform that lets users send a single prompt and compare responses from multiple LLMs (Gemini, Mistral) side-by-side in real time.
- Implemented secure JWT-based user authentication, REST APIs, and conversation management to support multiple simultaneous chat sessions per user.
- Built a responsive, interactive UI with a real-time chat experience, using code-splitting and lazy loading to keep the interface fast on slower connections.

Developer Portfolio (*Next.js, GSAP, Tailwind CSS — 2026*) [GitHub](#) — [Live Demo](#)

- Designed and developed a modern portfolio website featuring smooth GSAP scroll animations and interactive UI components.
- Built reusable, modular React components and fully responsive layouts optimized for both desktop and mobile.
- Deployed on Vercel following mobile-first design principles, with performance optimizations such as image lazy-loading and minimal bundle size.

Education

Bachelor of Computer Applications (BCA) 2022 – 2025

Mohammad Hasan PG College, Jaunpur, Uttar Pradesh (VBSPU)

Awards & Certifications

- Sheryians Coding School — Web Development (Certificate of Completion)
- Sheryians Cohort Hackathon 2026 — Participation Certificate
