Projects

- **Perplexity AI Clone (MERN + LangChain + Gemini API)** 2026
 - Developed a full-stack AI search engine capable of answering user queries with conversational responses.
 - Integrated authentication, chat history, AI response generation and internet search capabilities.
 - Built REST APIs with Express.js and MongoDB while maintaining responsive frontend using React.js.
- **AI Arena (Multi-LLM Comparison Platform)** 2026
 - Developed a full-stack AI platform that enables users to compare responses from multiple Large Language Models (LLMs) in real time.
 - Implemented secure user authentication, REST APIs, conversation management, and AI model integration using the MERN stack.
 - Built a responsive and interactive user interface with real-time chat experience and efficient backend architecture.
- **Developer Portfolio (Next.js + GSAP + Tailwind CSS)** 2026
 - Designed and developed a modern portfolio website featuring smooth animations and interactive UI components.
 - Implemented reusable React components, GSAP animations, responsive layouts and optimized performance.
 - Deployed the application using Vercel with mobile-first design principles.
